Training Program

TECHNOBIZZ

Awesome Internship cum career opportunities waiting for you....

Your search for a cutting edge technology and business analytics professional Career ends here.

With our technical and Real time experts, We provide our experience right from idea generation to the actualization of projects.

Internship and placement Program :-

Internship in reality is to provide a platform to students where they can get exposure to work life so that the transition from student to professionals can happen smoothly.

Training is a prerequisite for corporate workforce, more so for those belonging to technology and business sector.

We are offering Internship and Placement Programs for M.B.A and B.tech graduate...

- The training content covers the most important and current trends and topics in business, industry and IT.
- We ensure to assimilate learning on the technology front from real-time expert and include the same into the training course content which is live projects resulting into professionals.

Topics covered under entire spectrum of platforms-

- Mobility
- Business Analytics & Intelligence
- Cloud computing.

Mobility:-

Mobility combined with cloud computing is changing business – to make it more immediate, more relevant, and more intelligent.

Mobility will change business by:

➤ Rebuilding Business Processes to Work in a Mobile World:-

New operating systems and mobile devices will force companies to change how applications and business processes are designed. Mobile provides real-time access to sensory information such as location, direction, vibration, humidity, and sound. For example, a transportation company can use

sensors in trucks to ensure that it delivers fresh produce on time by monitoring temperature and humidity.

- **Creating portable services:** - Mobility will take on a new meaning as being portable using portable content and services use a combination of cloud storage, SaaS, cloud media and remote desktop access to store, retrieve and consume content on the go. Instead of business services being locked to the device or to the business location, employees will be able to authenticate to corporate services on any device just because using Two-factor authentication services.
- **Connecting Phones, Tablets, and the “Internet of Things.” :-**
Mobility and the “Internet of Things” require a company to modify its network-connectivity models as well as prepare for a massive increase in real-time information.

Business Analytics & Intelligence:-

Business Analytics is the subset of Business Intelligence, which creates capabilities for companies to compete in the market effectively. Business intelligence provides a way of amassing data to find information primarily through asking questions, reporting, and online analytical processes. Business analytics takes advantage of statistical and quantitative data for explanatory and predictive modeling.

Cloud computing:-

It is a type of Internet-based computing that provides shared computer processing resources and data to computers and other devices on demand. Cloud computing provides a way for your business to manage your computing resources online.

Cloud computing allows businesses to access their information virtually, creating a flexible and global way of accessing your data any place, any time.

Value added Benefits:-

- Trainees will get exposure in the emerging areas of Business Analytics & Intelligence, Mobility Solutions and Cloud services.
- Industry leading methodologies in developing the course content resulting into real time expertise.
- Majority of Business Enterprises are using ERP i.e. business process management software, Interns will get immediate acceptance from the Business Establishments.

- Nowadays ERP is integrating all facets of an operation including product planning, development, manufacturing, sales and marketing in a single database, application and user interface
So career opportunity is in boom for Interns.
- Current ERP Education Alliance programs covers the core business processes in areas like Sales, Procurement, Finance, Production etc. Where as our program is on emerging new dimensional areas of Mobility, Business Intelligence and Cloud.
- Selected Candidate as part of the Internship program in alliance with Companies/Business Establishments will get opportunities to work for many MNCs firm.
